WHAT IS FOUNDATION DIRECT FAMILY CARE?

FDFC is based on a direct primary care model. Meaning that we deliver high-quality, patient-led care where they are at the heart of our practice. We are going back to our medical roots and providing tailored, personalized medicine with modern technology - bridging old with new and eliminating all middle administrative frustrations.

WHAT WOULD FDFC MEAN FOR YOUR EMPLOYEES?

Here at FDFC, we flip the narrative. No more waiting weeks for appointments or experiencing insurance issues because we cut out the process of working with providers.

Because direct care is patient-led, members experience life-changing impacts on their health. Employees are more willing to seek out care for chronic conditions like diabetes and high blood pressure when they know their doctor will listen to them and work with them to develop a plan of action.

Employees also welcome the immediate financial savings at the point of care: employees pay nothing out-of-pocket to use the clinic.

HOW DOES FDFC DIFFER FROM TRADITIONAL PRIMARY CARE?

Our direct care practice allows our doctors to see and treat smaller patient panels, allowing physicians to spend as much time as needed with each patient, ensuring no question goes unanswered. The physician operates independently from your traditional insurance, meaning clinic staff is not burdened with claims processing and can focus on delivering patient care.

SAVES MONEY
for you and your employee

PROACTIVE HEALTHCARE
for less sick days

COMPETITIVE ADVANTAGE
for employee recruiting + retention
